**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. Applicant is advised that the Notice of Allowance mailed is vacated. If the issue fee has already been paid, applicant may request a refund or request that the fee be credited to a deposit account. However, applicant may wait until the application is either found allowable or held abandoned. If allowed, upon receipt of a new Notice of Allowance, applicant may request that the previously submitted issue fee be applied. If abandoned, applicant may request refund or credit to a specified Deposit Account. A new rejection is as follows.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 2, 3 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Jairam et al. (US 6,676,002).

With regard to claim 2, the reference of Jairam et al. discloses a device comprising: an adjustment mechanism (110) including a latching mechanism (118, 122) for latching a plurality of predetermined latching positions between the paper stop and the holder.

With regard to claim 3, Jairam et al.'s reference further discloses projections which latch with the ramped surfaces as shown in Figures 5 and 6 along the holder. The ramps and the projections meet the limitation of the claim.

Art Unit: 3721

With regard to claim 12, Jairam et al.'s reference discloses a device comprising: a holder (70), paper stop (98 angled surface), an adjustment mechanism (110) for adjusting the paper stop (98) in relation to the holder (70), the adjustment mechanism allows optional adjustment of an angle between the border of a sheet positioned against the paper stop.

However, claim 12 will be favorably considered if the adjustment device is defined in terms of the structure than its function and intended use.

***Allowable Subject Matter***

4. Claims 13-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: The most pertinent prior art of record fails to disclose the device wherein the paper stop includes: an angular part in the form of a segment of a circle; a fastening arm, which extends radially inward in the plane of the angular part from an angle bisector of the angular part and which, at a center point of the circle, comprises means for fastening the paper stop in a rotatable manner on the holder; and two stop components arranged at ends of the angular part.

***Conclusion***

Refer to attachment for notice of references cited and recommended for consideration based on their disclosure of limitations of the claimed invention.
